

### Benefits of using Aspen 2 fuel for Master 35®

- Better for operator health - reducing the exposure to harmful exhaust emissions.
- Reduces impact wrench maintenance costs by 30%.
- Eliminates the risk of damage to machinery from incorrectly mixing fuel/oil and can be left in the machine between uses and will not deteriorate.
- Can be used in all types of modern two-stroke engines.
- 99% cleaner than ordinary petrol.
- Aspen fuel does not contain harmful substances such as benzene, aromatic hydrocarbons or olefins.
- Better performance and a longer service life.
- Aspen also has the advantage that it is virtually odourless.
- It is fully synthetic with as much as 60% renewable content.
- It is biodegradable and free from ash and solvents.
- Aspen Alkylate Petrol contains less harmful substances than regular petrol, and is up to 99% cleaner when comparing the level of hazardous hydrocarbons.
- Aspen Alkylate Petrol emits substantially fewer substances, reducing the formation of ground level ozone which is harmful to humans, animals and plants.
